

What's Inside?

Eternal pioneered Hybrid technology in 2006 and inspired a whole new category of water heating. Our patented design makes Eternal the only true hybrid:

- 1 Dual Flow Sensor for improved control
- 2 ASME rated T&P valve is included
- 3 Water pressure switch prevents dry-fire
- 4 Computer controlled mixing valve injects cold water for precise outlet
- 5 Hybrid Heat Exchanger insulated for efficiency
- 6 Air pressure switch detects abnormal flue
- 7 Dual stage air ratio full modulation gas valve works on low gas pressure at 3.5"WC
- 8 Fully integrated controller board eliminates individual components for troubleshooting
- 9 EBM motor with suspension to reduce vibrations and noise. Twist and lock flange for easy disassembly.
- 10 Shielded igniter box is protected from Electronic Magnetic Interference (EMI) from outer shell
